Flexible media handling

Now you can on a wider range of paper sizes and types, from A6 to SRA3, plus 1200 mm banners. Acceptable paper weights range from 64 to 300gsm; automatic two-sided printing is possible on media right the way up to 188 gsm (*Come in and see the impressive media range it can print on*)

OKI®

C910DN

Rapid print speeds

The C910 prints at speeds of 16ppm in colour and 20ppm mono in A3 (up to 31ppm in colour and 36ppm mono for A4). 512MB RAM as standard, coupled with an 800 MHz processor, reduces job processing times and an optional 40GB Hard Disk Drive for storing and reusing job data can also be specified.

Ease of use and versatility

An Auto Media Detect function keeps productivity high by automatically detecting and selecting trays containing the correct paper, and automatic calibration keeps the quality of output consistent from the first page to the last. Specialist media can be handled with ease thanks to a convenient bypass tray.

Maximum uptime

The C910 uses ultra-reliable digital LED printing technology and a simple, flat paper path for longer trouble-free printing. Easily accessible, rapidly replaceable consumables also help to maximise uptime.
